

TECHNICAL SPECIFICATIONS

- Power supply - 230V 50Hz
- Maximum power - 2500W
- Steam trigger
- Boiler material - stainless steel
- Boiler capacity - 2 litres
- Operating pressure - 4.2 bar or 60.5 PSI or 420 K Pa
- Dimensions - L 450 X H 290 W x 340
- Weight - 6 Kgs
- Start up time – 6-8 minutes
- Steam runs for approximately 40 minutes
- 2 year limited warranty on boiler (domestic)
- 1 year warranty on parts and labour (domestic)
- **Finance available** (Conditions apply)

CLASSY AND ECONOMICAL

QV5 STEAM CLEANER

TECHNICAL SPECIFICATIONS

- Power supply - 230V 50/60Hz
- Maximum power – 2350 W
- Steam on/off switch
- Boiler material - stainless steel
- Boiler capacity - 1.2 litres
- Operating pressure - 4.5 bars or 65 PSI
- Continuous Steam
- Stainless steel body
- Dimensions - L 450 x H 290 x W 350
- Weight - 7 kgs
- Start up time - 3-4 minutes
- 2 year limited warranty on boiler (domestic)
- 1 year warranty on parts and labour (domestic)
- **Finance available** (Conditions apply)

USER FRIENDLY AND POWERFUL

QV6 CONTINUOUS STEAM

POWER OF STEAM

Steam is the ultimate, **environmentally friendly** cleaner. Harnessing the forces of nature, steam uses heat to soften the fats, greases and oils that trap stains onto and into surfaces, then high pressure steam vapour to blast the stain away.

Steam is the proven best method of cleaning many surfaces but you need **a constant supply of high pressure steam**. The QV5 and the QV6 at 4.5 bars pressure are so **technologically advanced** in their production of constant steam that lesser models fade to insignificance.

**THE WORLDS BEST CLEANER
FOR TILES AND GROUT**
