

ENVIRONMENT CONTROL

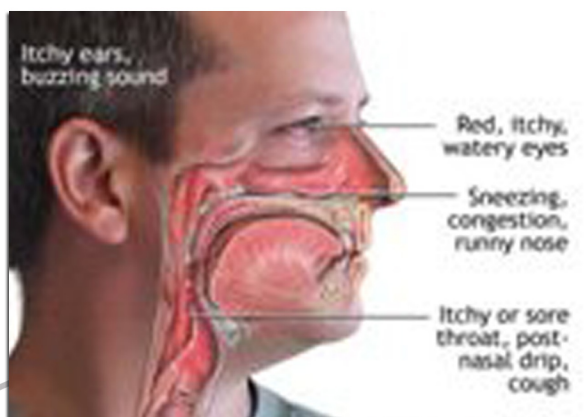

Bed bugs are becoming more and more of a problem in our society as they hitchhike into hostels, hotels and other accommodation providers before spreading into our homes.

The incredible Liberty Homecare steam with vacuum system not only kills these pests and their eggs with the application of high temperature steam but also vacuums up and filters away the residue including the faeces that affects us so much.

Dust mites are ever present in our modern world but you can improve the quality of your health by controlling their

population and the adverse effects of breathing in their waste, which is a major trigger for Asthma and Allergies

THE FACTS ABOUT FILTRATION

Most vacuums collect the larger, harmless bits of dirt but the minute particles of dust that can affect our health and quality of life, flow straight through the porous bags and are launched into the atmosphere making them more likely to be inhaled.

The Advanced Venturi Water Filtration System

The Liberty Homecare utilises a mixing chamber where particles of dust are mixed with and saturated by water before being trapped in the disposable water slurry.

Each time you clean, you remove all the dirt and you don't leave bacteria and germs in a dirty vacuum bag to proliferate, before being spread throughout the house next time you vacuum

LIBERTY HOMECARE

STEAM WITH VACUUM

Chemical free pest control is now at your finger tip.

TECHNICAL SPECIFICATIONS

- Boiler material - stainless steel
- Boiler Capacity - 1 litre
- Boiler reserve tank – 1.3 litres
- Boiler heating time - 4 – 5 minutes
- Continuous Steam
- Maximum boiler temperature - 150°C
- Power Supply - 230/240 V 50 Hz 10 amps
- Steam/Suction Hose - 3 metres
- Low voltage controls - 5 Volts
- Max steam pressure - 4.5 bars or 65 PSI
- Air flow (suction power) - 42 litres/sec
- Dimensions - L 430 x H 320 x W 350
- Weight - 11 kg
- Motor with three adjustable speeds
- Maximum power 2200W

Liberty Homecare

STEAM EFFECTIVENESS

Steam utilises high temperatures to soften the greases, oils, and fats etc, that bind dirt into and onto different surfaces. The pressure then blasts the dirt away. This is a non abrasive method of cleaning, making chores easier, quicker and less taxing than the old scrubbing methods.

Steam is the proven, worlds best method for cleaning tiles and grout and, with the addition of vacuum, becomes a unique cleaning tool for the maintenance of carpets, killing bacteria, germs and pests as it cleans.

In fact, most surfaces are cleaned faster and easier utilising the power of steam but be warned, to be effective a steamer must supply a constant, high level of pressure.

The Liberty Homecare at 4.5 bars of pressure and continuous refill gives you a constant supply of high pressure steam to simplify your chores, out performing less sophisticated models.

OPTIONAL EXTRAS

Steam Iron - Mat - Fibro cloth
Cobra Steam/Vac Tools - Steam Nozzle

APPLICATIONS

- Tiles, grout, carpet, laminate, wood and parquetry.
- Benches, range hoods, ovens, stoves, splash backs and stainless steel.
- Windows, mirrors, curtains, fly screens and upholstery.
- Toilets, spas, shower screens, fittings and basins.
- Mattresses, pillows, drapes, toys.
- Cars, boats, caravans, child seats.

Maintenance cleaning with the Liberty Homecare eliminates the high cost and harmful side effects of acids and toxic chemicals used in cleaning products to recreate nature's own healthy environment for you and this beautiful world we share.
